OEKO-KAD-Aspirator

Description: The aspirator (pooter, exhaustor) has a container volume of 100ml (82 x 49mm) and is easy to open by an Aluminium screw cap. It is transparent, unbreakable and resistant against chemicals as Ethylacetate.

- Aspirator types:**
- S1** with both tubes mounted in the cap,
 - S2** with one tube in the cap and the other one in the bottom of the container.
- Additional components:**
- FL** Container with screwable cap (best in combination with S1 to change containers)
 - SC** stopper for bottom tube (for S2 only) plus cap; so you can remove the tube and close the container with a stopper and a cap (space-saving transport of living specimens).

Name and Address
